

“To prepare for our move at the end of this year, we needed a new Unified Communications system with voice, video and presence. We hired Crown VoIP & IT to create the RFP, find appropriate vendors and help us evaluate solutions. Once each bidder showcased its technology, it came down to matching the technology with our requirements and determining who could provide the right support package while being aggressive with pricing. Don Campbell at Crown did a great job of creating spreadsheets for the evaluation and explaining the technical differences. I was pleased with the phones, video and the price.”
